EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Newly submitted claims 24-27 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 24- 27 are directed to a method for producing aluminum and the original claims were directed to an electrolysis cell having an anode of carbon with non-continuous slots. The search for the method of producing aluminum is not the same as that for an electrolysis cell. The electrolysis cell is found in class 204/243.1 and the method for producing aluminum is found in class 205/372.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 24-27 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

3. This application is in condition for allowance except for the presence of claims 24-27 directed to a method of producing aluminum non-elected without traverse. Accordingly, claims 24-27 have been cancelled without prejudice and applicant retains the right to refile these claims in a continuing application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.
